

We help students with Special Educational Needs and Disabilities (SEND) reach their educational goals!

The Student Support Portal is an on-line community designed for education professionals, students with additional needs or a disability and their parents. Our goal is to remove barriers to learning and raise attainment levels by connecting the world's leading assistive technology (AT) publishers and hardware manufacturers with those who would benefit from their services.

Student Support Portal: For Schools

- An initial collaborative review of special needs provision in the institution and an agreed action plan for a pilot of selected supports
- Enable your staff to engage directly with the world's leading Assistive Technology Publishers
- Access to regular free CPD and training events
- Encourage sharing of resources and best practice among schools in your district via online discussions, Q&As and galleries
- Provide a support network for all of your teachers
- Remove barriers to learning by giving your students access to the most appropriate assistive technology for their specific needs
- Raise attainment levels
- Improve school ranking
- Access to the Portal can be restricted to internal staff or widened to include all students and their families depending on the needs of the school
- Private community groups are available for SEND teachers

Student Support Portal: For Students

- Learn how to use the latest assistive technology to remove barriers to your learning
- Engage with other students with similar needs
- Access resources and content through the Portal
- Become part of a community who believe in unlimited possibilities
- Use the available tools to achieve the qualification you need to secure the job you want

Student Support Portal: For Parents

- Purchase proven assistive technology solutions for your child
- Book and attend webinars and events published on the Portal Calendar
- Receive support and advice directly from software publishers and manufacturers
- Join discussion forums specific to your area of interest
- Download resources and content relevant to your child's needs
- Access research documentation and case studies from the world's leading assistive software publishers and hardware manufacturers
